LINDUM GARDENS' EXHIBIT, 1951 SHOW, AMERICAN RHODODENDRON SOCIETY

You Are Welcome to Scenic LINDUM GARDENS

For the past several years I have been collecting from Europe and Canada and the United States, the World's finest varieties of Rhododendrons and Hardy Azaleas. Over 350 varieties are now growing on my hillsides in one of the nation's largest and finest collections displayed in a most scenic setting.

In the months of April and May over 15,000 Deciduous and Evergreen Azaleas in 75 of the World's finest varieties shine out in a "Blaze of Glory" in Lindum Gardens overlooking the Tualatin Valley. A riot of colors, ranging from the softest creams through the brightest yellows and oranges and the fieriest red, march in mass formation up and down the hillsides. These brilliant gems are held in a luminous setting, flanked on both sides by a galaxy of over 300 of the finest varieties of Rhododendrons resting in little cups among the birches on the hillsides, and on the west is the broad expanse of the checkered Tualatin Plains rising to the mountains in the distance. Imported from the gardens of Europe these choice varieties of Rhododendrons and Azaleas are now available to you in our Nursery to add to the splendor of your garden.

DESCRIPTIONS, GRADES, AND PRICES

It is difficult to describe the size, shape and quality of all plants in a general list. A slow growing, compact, spreading plant, like Britannia, Jan Dekens or Unique is worth more, in a 15"-18" plant, than a tall rangy growing plant like Beauty of Littleworth, Pink Pearl, Antoon Van Welie or Sappho. Therefore, in placing a price on a plant consideration will be given to its comparative size value.

Plants especially selected at the nursery will be priced according to their shape and value irrespective of the general price in this list.

A discount of 10% will be given on orders over \$100.00.

PLANTING NOTES

Rhododendrons will grow in any soil that does not contain lime, is porous without being dry and is fairly rich in humus. They have a close fibrous root system and if well watered can be transplanted almost any time, but the best seasons are from September to June, preferably in the fall and spring. Plant them not more than an inch deeper than they were planted in the Nursery, in a mixture of Peat Moss or other humus and good top soil, preferably half and half, mixed in a hole 3 feet in diameter by 20 inches deep. If the soil is clay or very poor, remove the soil to a depth of 18", put in good leaf mold, top soil, humus and peat. Cut out the tree roots. Avoid heavy muck or loam without air in the soil. Use good soil and little fertilizer. After planting, mulch with leaves, leaf mold, or well rotted cow manure. They will not grow in alkaline soil. Remove seed pods as soon as blooms have faded.

GENERAL STANDARD

As a guide to follow in establishing a standard plant in spread in the larger sizes we will take an average plant in spread for a given variety in a specified height, say 18" to 24", and call that a standard plant. If the plant is below standard for that variety it will be graded and priced one size smaller. But extra bushy plants will be graded to larger sizes as follows.

EXTRA BUSHY PLANTS

Extra bushy plants will be priced the same as a higher size and more than extra bushy plants will be the same as two sizes higher. In general, large size plants over 18" will be priced according to their shape, bushiness and real value and not just their height.

PICK OUT YOUR OWN PLANTS

You are welcome at any time to see this display and to pick out your own plants in the Nursery from a stock of over 35,000 plants. Both the imported plants and those propagated here from fine stock have been grown in very fine soil and have a well established root system. The plants are of the finest quality.

SYMBOLS

First Class Certificates (FCC); Awards of Merit (AM); Hardiness ratings (B) and stars (*) were given by the Royal Horticultural Society of England. Blooming seasons as a rule are from March to June and plants are marked (VE) very early, (E) early, (ME) medium early, (M) mid-season, (ML) medium late, (L) late, and (VL) very late. Most varieties will stand full sun if kept watered, but prefer part shade. Some varieties require part shade with plenty of day light and in dry, hot areas of the East and Mid-West, part shade is essential.

Where the variety is not too new to be rated the stars (*) indicate the quality rating given in England. Our opinion may be different.

The range in the hardiness of the Rhododendron (English rating) is marked (AA), (A), (B), (C), (D) and (E). (AA) "Iron Clads" for northern United States. (A) will stand full exposure to sun and cold, (C) is hardy West of the Cascades and should have partial shade in most cases. (D) and (E) are Tender.

Growers in Long Island, New Jersey, Delaware, Maryland, Virginia, and Kentucky report that plants rated (A) and (B) should succeed there in part shade. Those rated (AA) are the "Iron Clads" for the colder parts of the East, Mid-West and Northern States.

PORTLAND HARDINESS RATING

After the cold winter of 1949-50 when the temperature here dropped for a long period from -5° to -16° in most nurseries, the American Rhododendron Society sent a questionnaire to its members to determine the damage caused by the cold and the degree of coldness different varieties would stand. From the results many varieties were rated. These were rated as given below (H-2), based on the minimum temperatures which the variety given may be expected to stand with no injury to leaf, stem or bud. Where the variety is rated it is given first after the English rating. These ratings are as follows:

H-1—Varieties hardy to -25° F. These varieties should be hardy in southern New York and southern New England.

H-2—Hardy to -15° F; H-3—Hardy to -5° F. These varieties should be fairly hardy in the southern part of Long Island, Cincinnati, Washington, around Philadelphia and St. Louis.

H-4 Hardy to $+5^{\circ}$ F; H-5—Hardy to $+15^{\circ}$ F. These varieties should be hardy during most winters in the Portland and Seattle areas.

AZALEA HARDINESS

The azaleas listed are much more hardy than most of the rhododendrons. The Ghents and most of the others will stand the winters of the Mid-West and Lake States. The Malvatica Evergreens have been grown in Ohio, Illinois and Michigan. To stand the dry summers of the inland States they need part shade.

TERMS OF SALE

The World's Finest DECIDUOUS AZALEAS

A MOLLIS HYBRID AZALEA

Many garden lovers class these Azaleas at the very top in brilliance, range of color, and beauty of flower. In the months of April and May, they are a mass of strong colors—red, orange, yellow, gold, white, copper, bronze, pink, crimson, mauve, and variegated. We have 75 of the finest varieties blooming for six to eight weeks. First the Molles, then the Occidentales and then the Ghents with the Occidentales still in flower. They like sun but in the Mid-West where the air is dry and the sun burning, they prefer part shade. They like the same soil as Rhododendrons but will stand more exposure. Plant at the same depth as they were at the Nursery. It is preferable to remove the seed pods after blooming. All large plants are budded, ready for spring bloom.

BEAUTEOUS AND FRAGRANT OCCIDENTALIS HYBRIDS

Comparatively new in the Portland market are these flower gems, which in the spring present a mass of blooms in the softer more refined shades and fill the air with delicate perfume. The different varieties form one of the loveliest groups of plants. Their shades range through the pinks, creams, white, yellows and soft oranges, variegated and blended in pleasing harmony. Budded, ready for spring bloom.

- ****DELICATISSIMA.** Creamy white with pink and yellow and orange shades. 18 to 24 in. plants \$7.50; 24 to 30 in. plants \$8.50.
- ****EXQUISITA.** This is the latest of the Occidentalis to bloom. It has shades of pink and white and light yellow and cream and the leaves start their growth with the flowers still in bloom. 12 to 15 in. \$3.50; 15 to 18 in. \$5.00; 18 to 24 in. \$6.50; 24 to 30 in. \$8.50; 30 to 36 in. \$10.00 to \$12.50.
- ****GRACIOSA.** Blooms of this variety have a sharper contrast of stronger colors—Creamy pink with orange and yellow markings. One of the best. 15 to 18 in. \$6.00; 18 to 24 in. \$7.50.
- ****IRENE KOSTER.** This is the earliest of the Occidentalis to bloom. It has shades of soft, light and dark pinks, and fills the air with fragrance. 12 to 15 in. \$3.50; 15 to 18 in. \$5.00; 18 to 24 in. \$6.50; 24 to 30 in. \$8.00.
- ****MAGNIFICA.** This variety is similar in color to Graciosa. Creamy white flushed pink with yellow and orange only softer color contrasts. 12 to 15 in. \$3.50; 15 to 18 in. \$6.00; 18 to 24 in. \$7.50; 24 to 30 in. \$9.00; 30 to 42 in. \$10.00 to \$12.00.
- ****SUPERBA.** This has the lighter shades like Exquisita only with an apricot blotch, being pink and cream and apricot. 18 to 24 in. \$6.50.

HARDY GHENT HYBRIDS

Hybridizing of Azaleas started in Ghent, Belgium, in 1825. Since then they have been crossed and re-crossed many times to form our present varieties. These Pontica Hybrids or hardy Ghent Azaleas have a wide variety of strong colors, true and variegated. They are red, orange, yellow, light yellow, bronze, white, pink, crimson, mauve, purplish red and mixtures of colors. Their individual honeysuckle shaped flowers are smaller than the Molles and they are later to bloom than the Molles or Occidentalis Hybrids. They are hardy enough for the northern part of the United States. All budded, ready for spring bloom.

- * **BOUQUET DE FLORE.** Bright pink, pale pink and white stripes. Very beautiful. Late. 12-15 in. \$3.50; 15-18 in. \$5.00; 18-24 in. \$6.00.
- ****COCCINEA SPECIOSA.** The color of this bloom is very similar to Gloria Mundi and the habit of growth is similar but not quite so spreading. Orange predominates. 12-15 in. \$3.50; 15-18 in. \$5.00; 18-24 in. \$6.00; 24-30 in. \$8.00 to \$10.00.
- * **DAVISSI.** Creamy white, pale yellow eye, very hardy. Fine for woodland planting. 15-18 in. \$5.00; 18-24 in. \$6.00.
- * **DR. CHAS. BAUMAN.** Deep blood red. 12-15 in. \$3.50; 15-18 in. \$5.00.
- * **FANNY.** A beautiful rose-pink. 15-18 in. \$5.00; 18-24 in. \$6.00.
- ****GLORIA MUNDI.** This is a lower, more branching and broader plant than Unique and blooms later. In fact, it is one of the latest to bloom. Its color is not as sharp and strong as Unique and a little darker in shade. It has orange and red and yellow markings with orange predominating. 15-18 in. \$5.00; 18-24 in. \$6.00; 24-30 in. \$8.00; 30-34 in. \$10.00 to \$15.00.
- * **IGNEA NOVA.** Carmine-red, yellow lobe. 15-18 in. \$5.00; 18-24 in. \$6.00.
- * **SANG DE GENTBRUGGE.** Dark crimson. Late. 15-18 in. \$5.00; 18-24 in. \$6.00.

A GHENT AZALEA—NANCY WATERER

- * **NANCY WATERER.** This has a large, bright, deep golden yellow flower with lighter shades. One of the best. 15-18 in. \$5.00; 18-24 in. \$6.00; 24-30 in. \$7.50.
- * **NARCISSIFLORA.** A taller growing clear sulphur yellow. 18-24 in. \$5.00; 24-30 in. \$6.50.
- * **PALLAS.** Red and a little earlier than the others. 15-18 in. \$5.00; 18-24 in. \$6.00.
- * **RAPHAEL DE SMET.** White and rose. Double. 12-15 in. \$3.50; 15-18 in. \$5.00.
- ****UNIQUE.** This is a very striking, strong, bright deep buff-yellow, blushed and suffused orange. Large truss; open habit. A taller grower than the others and one of the very best. 15-18 in. \$5.00; 18-24 in. \$6.00; 24-30 in. \$7.50; 30-36 in. \$9.00; 36-42 in. \$12.50.

18-24 in.	\$6.00	24-30 in.	\$7.50

* **AIDA.** Rose, slightly tinted lilac. Spreading bush, long lasting flowers. Late.

* **CORNEILLE.** This is a taller-growing plant. The flowers are distinct and beautifully dainty. They are little apple-blossom rosettes, light pink in the center with dark pink and red stripes on the edges. One of the best.

* **FREYA.** Nankeen yellow, tinted salmon-orange.

* **IL TASSO.** This is the first of the group to bloom. The plants are bushy. The flowers are soft rose-red tinted salmon.

* **NORMA.** It is similar to Il Tasso only a little later to bloom and slightly brighter in shade.

VELASQUEZ. This bush has a little wider spread than the others. There are two shades of color. One is a transparent cream and the other is a transparent white.

KNAP HILL AZALEAS

Exbury Strain

This new strain of hardy deciduous Azaleas, developed at Exbury, is reputed to be the finest in the world. We have not yet been able to obtain a stock of the named varieties but can offer small seedlings of the varieties in a wide range of brilliant colors. They bloom at about the same time as the Ghent Hybrids. The flowers are large with lasting qualities and range in all colors—red, yellow, apricot, pink, salmon, flame, orange, but have not yet been separated into color groups.

9-12 in. \$2.50

THE EXTRA HARDY MALVATICA EVERGREENS

This is a relatively new group and is destined to have a permanent place in our gardens. They have larger flowers and larger bushes than the Kurumes. The plants will grow to about 4 feet in height and 5 feet across and are smothered with bright blooms in the spring. They are very hardy and range in color through the various shades of pink and rose, orange and red. Fine for foreground and mass planting. Will stand full sun but the flowers last longer in part shade. Have grown in the coldest parts of Ohio, Illinois and Michigan. Budded and ready for bloom.
